Work History

Budget Transmission Masters, Albuquerque, NM —
Tech

October 15 - October 29

Service Transmissions, plus general automotive maintenance.

Ray's Car Care, Albuquerque, NM — *Lube Tech*

June 2020 - October 2020

Serviced state and customer vehicles, interacted with customers, gave them rides home when needed, helped lead tech with variety of repairs, as well as performing a variety of repair myself.

CodeCanna Web Solutions, Albuquerque — FullStack Web Developer

June 2013 – Now

I deliver FullStack and fully mobile friendly user experiences and solutions for personal and/or business websites. I use a multitude of tools and software to code custom and intuitive software solutions.

Bob Fink's Heating and Cooling, Albuquerque — Sheet Metal Installer

January 2021 – Now

I install sheet metal duct in home under construction, as well as run as a "Helper" with the main tech on service calls.

MechenbierIT, Albuquerque, NM — WordPress Web Developer

January 2020 - March 2020

Maintained, updated, and developed multiple websites using a combination of WordPress, JavaScript, CSS, and HTML as an independent remote developer.

KBJ Trucking LLC, Lancaster, SC — Driver

July 2018 - September 2018

Loaded and transported wood from a client's location to the papermill.

Full Power Express, Lancaster, SC — Driver

March 2018 - July 2018

Drove cross-country as a flatbed trucker.

Mesa Radio, Albuquerque, NM — Installer

December 2017 - March 2018

Pulled customer's cars in and out of the garage and installed radio and alarm systems in their vehicles.

Uber, Albuquerque, NM — Driver

August 2015 - November 2017

Drove customers from their pick up location to their drop off location in a timely manner while providing excellent customer service and following local driving laws.

Yellow Cab, Albuquerque, NM — *Mechanic*

November 2015 - February 2016

Pulled customer's vehicles into bays and performed general maintenance tasks like changing oil, changing brakes, and refueling.

Special Projects

CNM Ingenuity Code-Athon — *October 2019*

Participated in a coding competition between five teams to create a web application that successfully stores information using the Blockchain, which had to be completed and submitted within 24 hours. My team consisted of myself and one other person.
